

Electrical Technology Services is an industrial electrical maintenance and supply company. Our services include: Testing, reconditioning, retrofits and conversions, engineering, and equipment sales and rental.

Testing and Maintenance Services

- Protective Relays and Meters
- Motor Vibration and Alignment
- Infrared thermal imaging and analysis
- Transformer fluid analysis
- Transformer electrical testing
- Ground systems
- Battery banks and capacitors
- Metal frame and molded-case circuit breakers 480V to 35KV
- Switches and motor starters from 480V to 35KV
- AC/DC Motors and control systems
- High Voltage Cables

24 hour Emergency Services

- ETS can provide turn-key service for electrical emergencies at your facilities 24 hours a day 365 days a year. We have technicians located throughout the state and work closely with several electrical contractors with additional resources to assist if they are needed.

Reconditioning Services

- Metal Frame Circuit Breakers from 480V to 35KV any make, model, or vintage
- Switches and Motor Starters from 480V to 35 KV
- Transformers

Retrofits and Conversions

- Digital trip units for 480 V breakers
- Digital Protective Relays (often without any power interruption)
- Vacuum conversions for most circuit breaker, switches, and starters
- PCB fluid replacement

Engineering Services

- One-line, short circuit, and Coordination Studies
- Power factor, Quality, and Load Studies
- Ground Systems and Substation Design
- Metering and Power Monitoring
- Arc Flash (NFPA-70E) Studies and Training
- Electrical Safety Training and Independent Site Electrical Safety Audits

Equipment Sales and Rental

- New, used, and reconditioned circuit breakers, starters, switches, transformers, relays, meters, Emergency substations, and much more...
